HORIZONTAL STRAPPING
MACHINE

SMART - FLEXIBLE - SIMPLE

The **06ACTIVE** is a **horizontal strapping machine** primarily designed for the **brick and concrete interlocking paver industry**. It is suitable for use with both palletized and non-palletized products on automated lines.

The **head movement** and opposite **strap guide** are **pneumatically operated**, while the arch's upward and downward motion is managed by a gearmotor controlling a belt system, **all driven by an inverter**

STRAPPING

WHY BUY

HIGH PERFORMANCE AND SPEED

QUICK AND EASY INSTALLATION

CONFIGURABLE MODULAR STRUCTURE

NOISILESS AND QUICK MOVEMENT

USER FRIENDLY & EASE OF MAINTENANCE

SAFE & DURABLE

LOWER CONSUMPTION

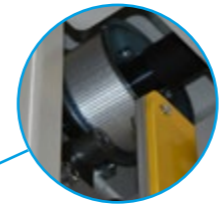

FEATURES

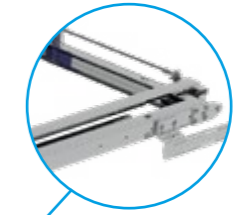

Pneumatic head movement
towards the package with probe
for stroke stop

Belt Drive

**Arch with steel structure and
aluminum strap passage, with
anti-collision safety photocells**
for descent movement

**Automatic descent
blocking device, in any position,**
for machine maintenance

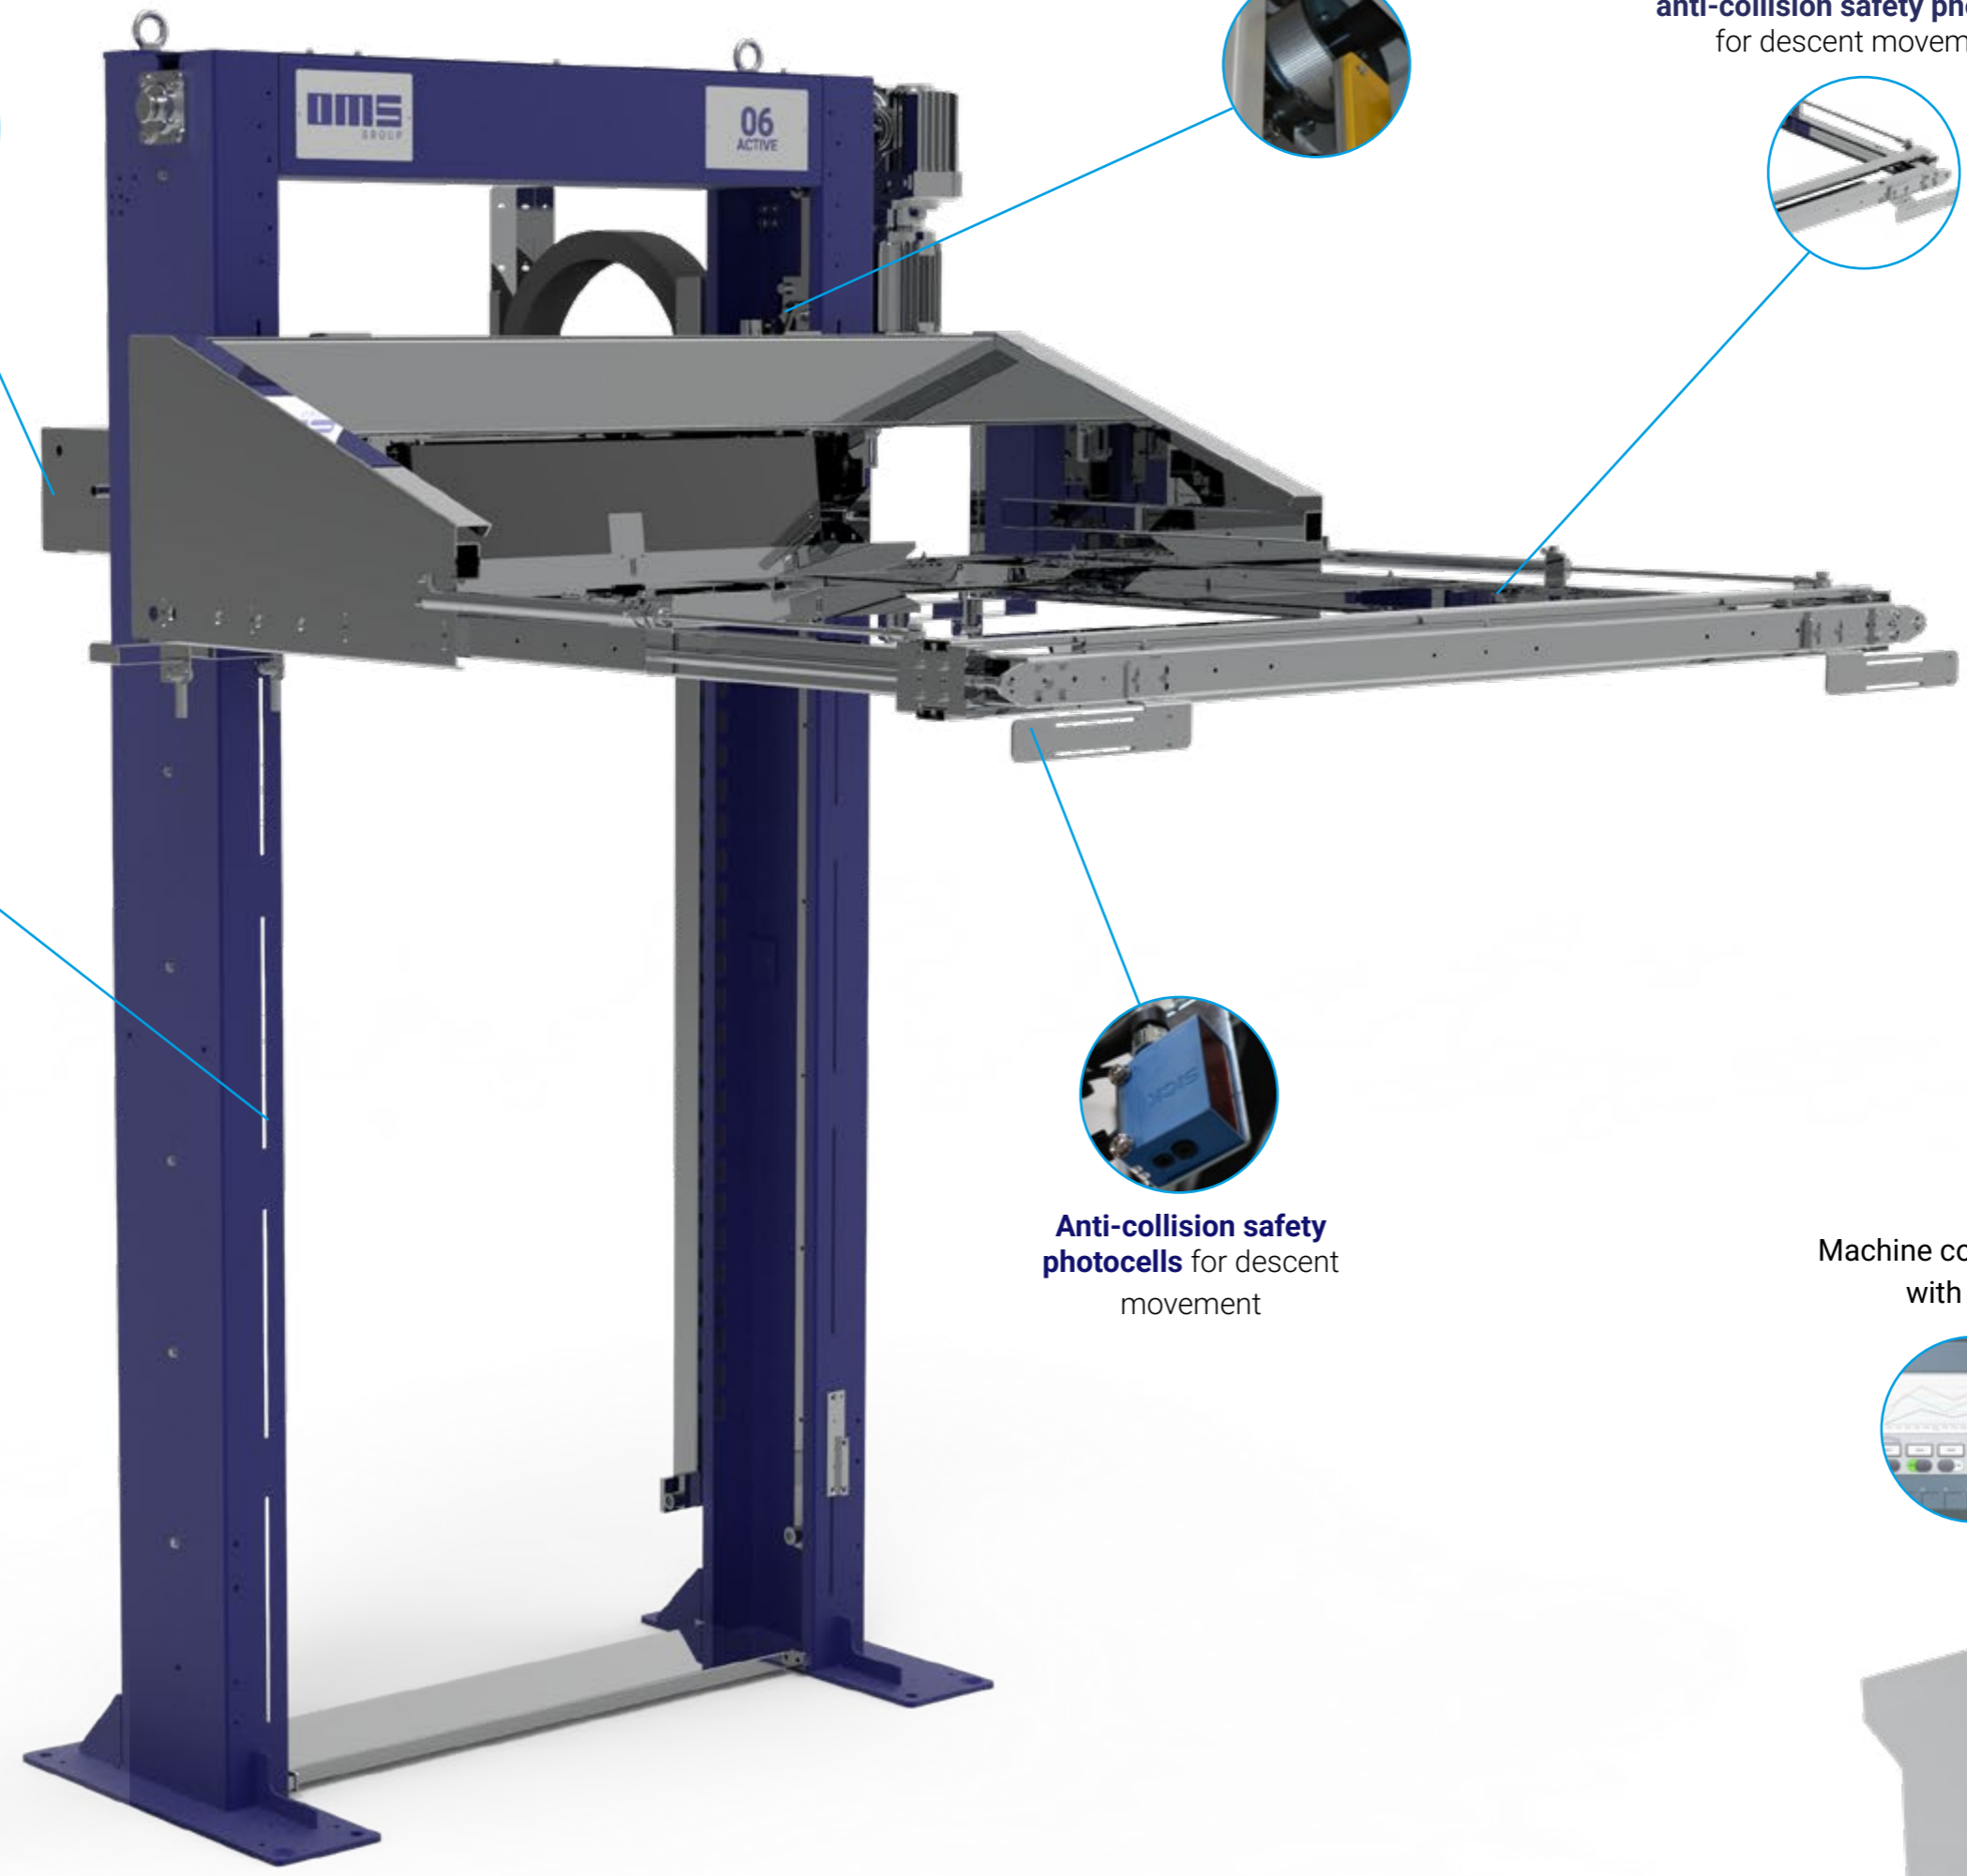

**Standard coil holder
PB 11**

**Anti-collision safety
photocells** for descent
movement

**Machine control panel
with HMI**

Other features

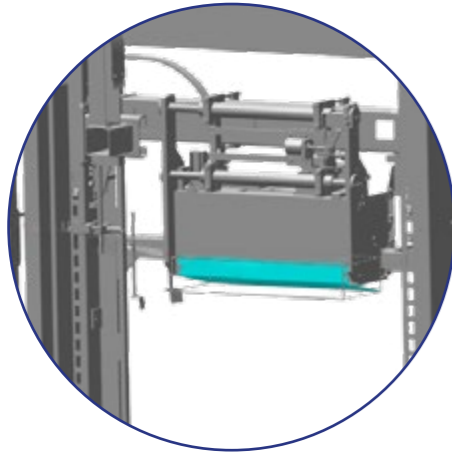

Strap guide advancement stroke up to 620mm

Strap end sensor on coil holder

Feeler plate for head stop on package

Optionals

- Automatic strapping re-feed

Applications

BRICKS

CONSTRUCTION

CERAMIC

LOGISTICS

GLASS

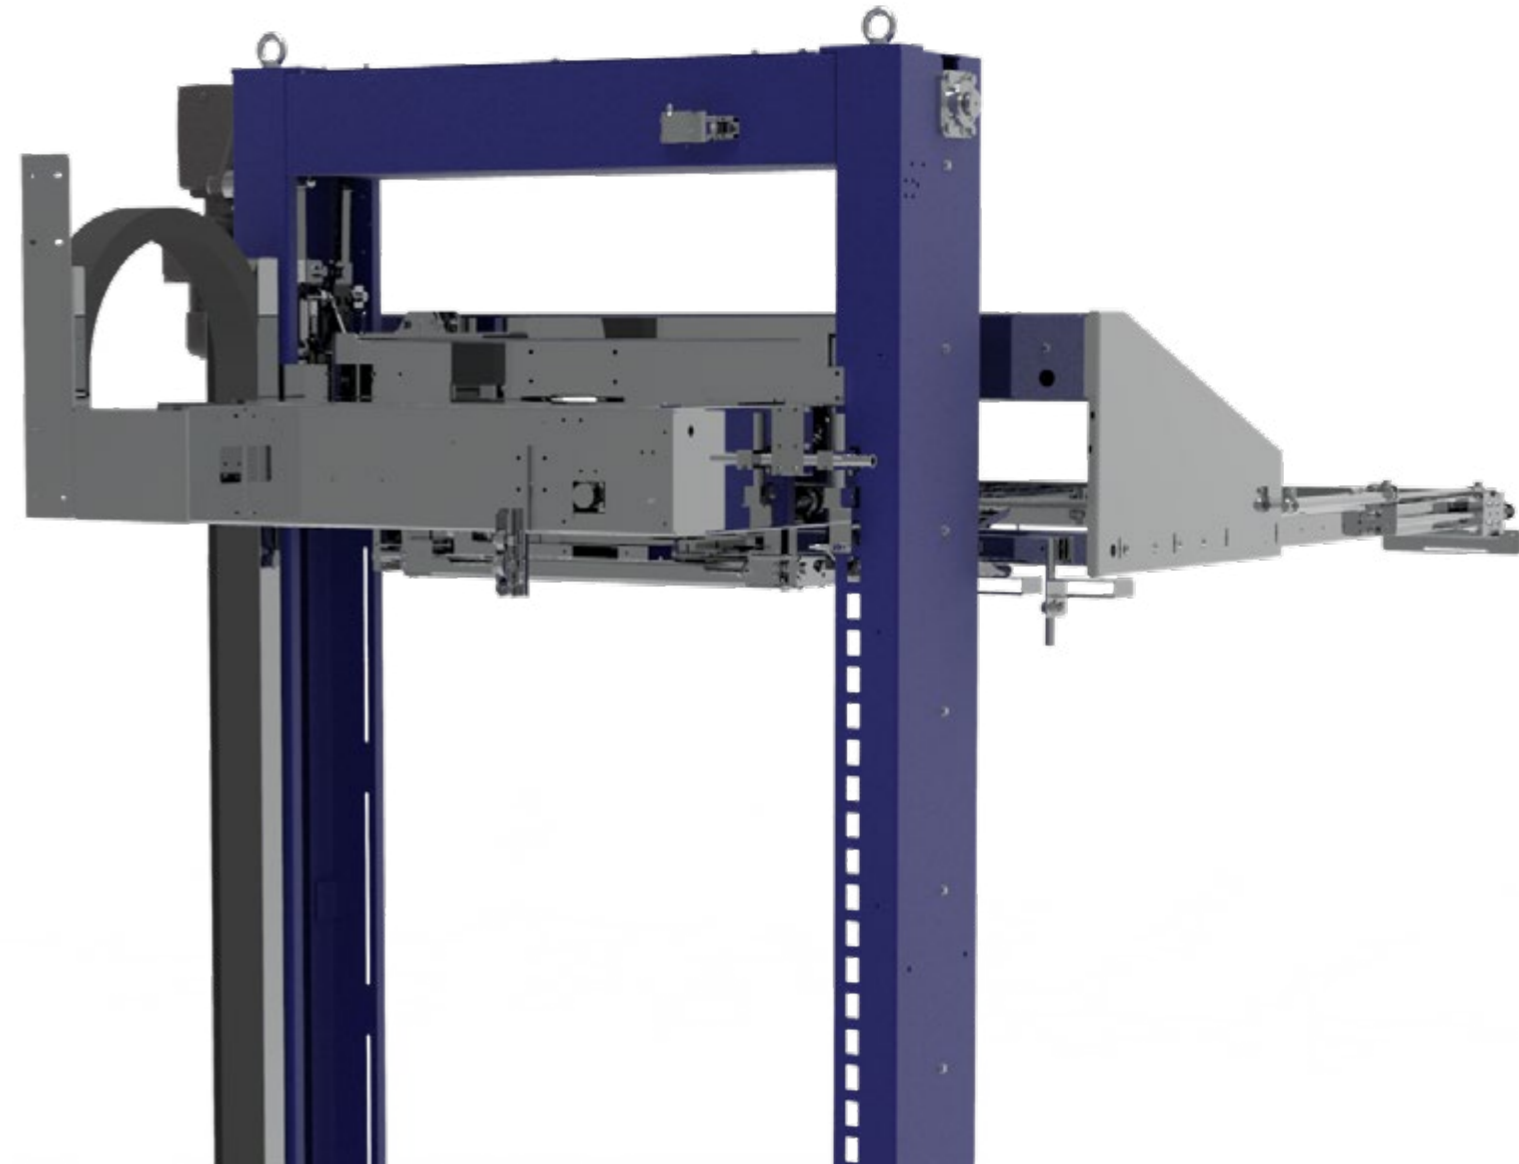

FRUITS and
VEGETABLES

BALES
